JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 24, No. 4, APRIL 1978

Subject Index to Volume 24

Abel integral equations, 207
Accessory minimum problem, 475
Admissible cone, 421
Aerodynamics, 169
Affine minorants, 569
Algebraic invariants, 153

Bang-bang control, 315
Bioeconomics, 361
Boundary-value problems, 59, 89

Calculus of variations, 507
Cauchy problems, 89
Characterization theorems, 549
Collocation method, 169
Complementarity, 243
Complementarity problem, 499
Conjugate directions, 387
Conjugate Gram–Schmidt algorithms, 387
Constraint qualification, 263
Constraints, 263
Continuous Kuhn–Tucker theorem, 243
Continuous nonlinear complementarity, 243
Continuous nonlinear programming, 243
Control theory, 153, 475
Controllability, 315
Convergence, 325
Convergence proofs, 617
Convex programming, 287
Cost functions, 371
Critical points, 549

Decomposition techniques, 437
Difference equations, 459
Differential dynamic programming, 617
Differential equations, 221
Discontinuous control, 315
Dual cone, 421
Dynamic programming, 607

Economic growth, 607
Economic planning, 507
Eigenfunctions, 59
Eigenvalues, 59
Equivalent differential systems, 133
External cone, 421
Extremal signature, 549

Feedback control, 315
Fish-harvest, 361
Fixed point theorems, 499
Fredholm integral equations, 5, 59, 89
Fredholm integral operators, 153
Free endpoints, 303
Fritz John problem, 449
Function generators, 371
Function minimization, 375, 387

Galerkin's method, 169
Generalized Lagrangian, 437
Generalized weight function, 549
Global principle, 303
Gradient projection methods, 523
Green's functions, 59

Imbedding methods, 29
Incomplete information, 337
Inf-convolution, 569
Infimal convergence, 287
Infinite horizon problems, 639
Infinite memory, 337
Infinitely constrained optimization problems, 449
Initial-value methods, 133
Integral constraints, 325
Integral equations of the first kind, 169

0022-3239/78/0400-0661$05.00/0 © 1978 Plenum Publishing Corporation

Integral equations, 29, 89, 133, 221
Internal cone, 421
Invariant imbedding, 459
Isoperimetric problems, 325
Iterative methods, 5, 459, 617

Kuhn–Tucker conditions, 617

Lagrange multipliers, 325, 371, 569
Large-systems optimization, 437
Least-square solutions, 387
Local cone, 263
Lower closure theorems, 639

Mathematical programming, 375, 449
Matrix-Riccati differential equation, 485
Maximality, 585
Maximum principle, 303
Method of multipliers, 437
Minimization with constraints, 549
Minimizing controls, 475
Min-max principle, 303
Modeling, 507
Multiplier methods, 523
Multiplier rules, 263
Multistage discrete games, 337

Neumann series, 5
Neustadt derivative, 263
Newton's method, 617
Nonlinear optimization, 375
Nonlinear programming, 523
Nonlinear separable programs, 617
Numerical integration, 221
Numerical methods, 5, 29, 133, 153, 207, 221, 387
Numerical solutions, 89, 325

Open-loop strategy, 303
Operations research, 507
Optimal control problems, 639
Optimization, 325

Packing problem, 207
Parameter optimization, 523
Penalty function methods, 523
Penalty functions, 287
Pointwise convergence, 287
Precision point synthesis, 371
Production and marketing decisions, 449

Riccati equation, 153
Riccati transformation, 459

Saddle points, 303
Second-order conditions, 475
Separation theorem, 421
Sequential decision-making problems, 485
Singular arcs, 607
Singular kernels, 169
Singular optimal control, 361
Stackelberg strategies, 485
State-dependent control restraints, 585
State restraints, 585
Statistics, 207
Stereology, 207
Stiffness of links, 371
Sturm–Liouville problems, 59

Systems of convex inequalities, 499

Tangent cone, 421
Time-optimal control, 315, 585
Transport theory, 5
Two-point boundary-value problems, 459

Unconstrained optimization, 375

Volterra integral equations, 133, 207

Zero–sum games, 337
